Amplify Basic Task (B) Mechanism

AMPLIFY STOOL BASIC TASK MECHANISM

The Amplify stool basic task (B) mechanism is a pneumatic lift that easily adjusts to the perfect seat height.

MESH BACK AND UPHOLSTERED BACK MODELS

To raise the seat, lift weight off the seat and push down on the lever. Release the lever when the seat reaches the desired height. To lower the seat, push down on the lever while seated; release the lever when the seat reaches the desired height.
