CAUTION

Use with products heavier than the rated weights indicated may result in instability causing possible injury.

Mounts must be attached as specified in the assembly instructions. Improper installation may result in damage or serious personal injury.

Safety gear and proper tools must be used. This product should only be installed by professionals.

Make sure that the supporting surface will safely support the combined weight of the equipment and all attached hardware components.

Use the mounting screws provided and DO NOT OVER TIGHTEN mounting screws.

This product contains small items that could be a choking hazard if swallowed. Keep these items away from children.

This product is intended for indoor use only. Using this product outdoors could lead to product failure and personal injury.

Recommended Tools

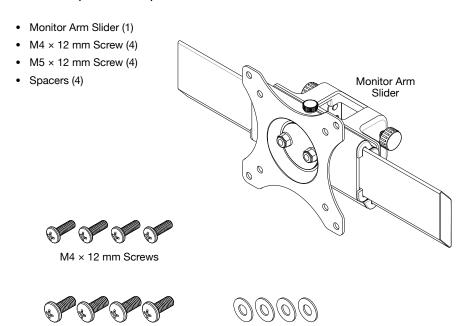

M5 × 12 mm Screws

#2 Phillips Screwdriver

Parts

IMPORTANT: Ensure that you have received all parts according to the component checklist prior to installation. If any parts are missing or damaged, contact our customer experience for replacement.

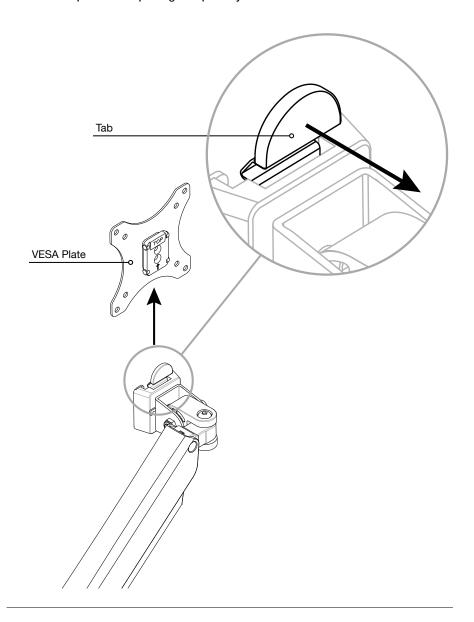

Spacers

Step 1: Remove the existing VESA plate by pulling on the tab.

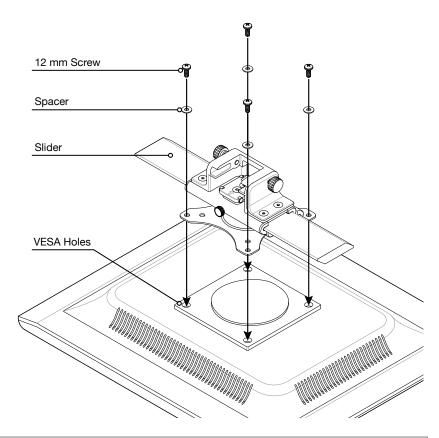

If the monitor arm and slider were purchased together, skip this step. The monitor arm's VESA plate will be packaged separately in the box.

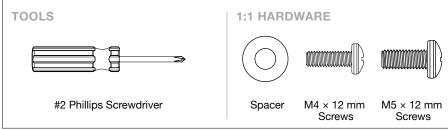

Step 2: Attach the slider to the back of the monitor with the screws that best fit the VESA holes.

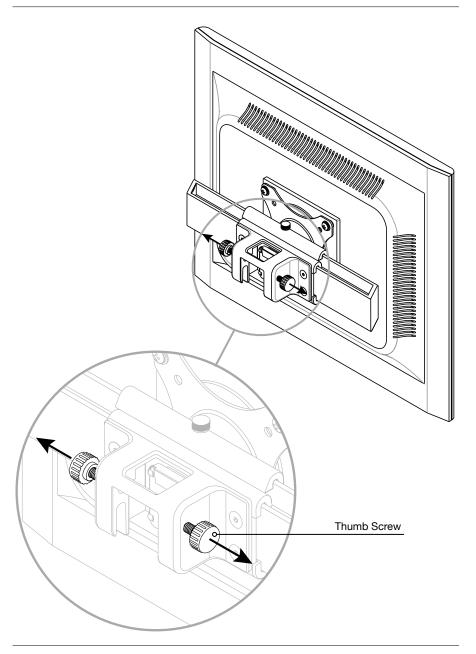

Failure to select correct length of screw for the monitor, may cause damage to the monitor or cause it to dismount from the VESA plate.

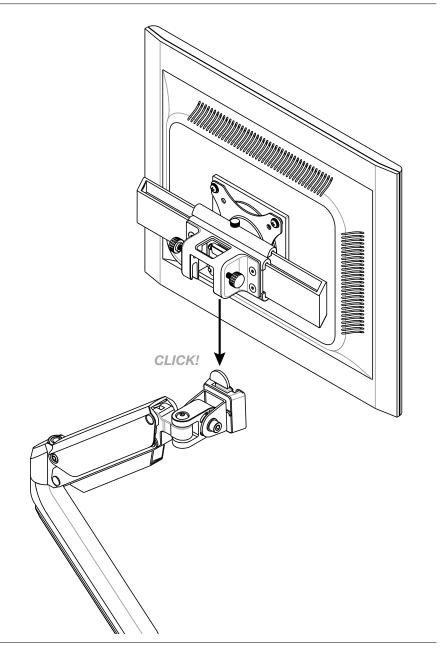

Step 3: Partially loosen the thumb screws.

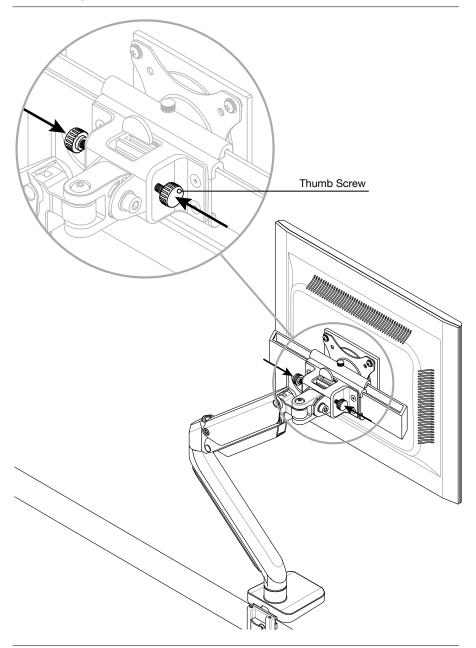

Step 4: Click the slider and monitor into place on the monitor arm.

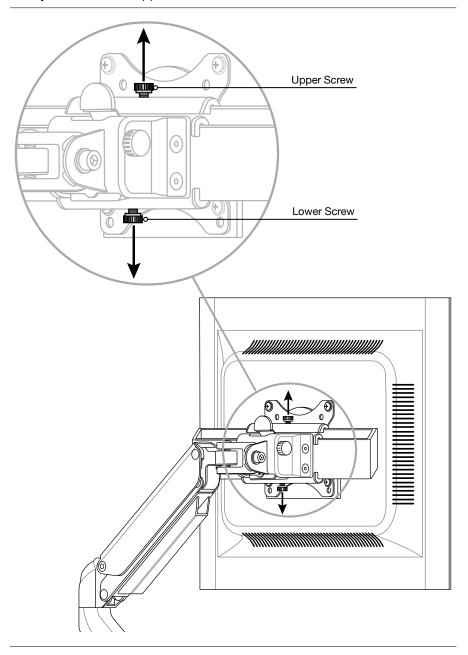

Step 5: Tighten the thumb screws.

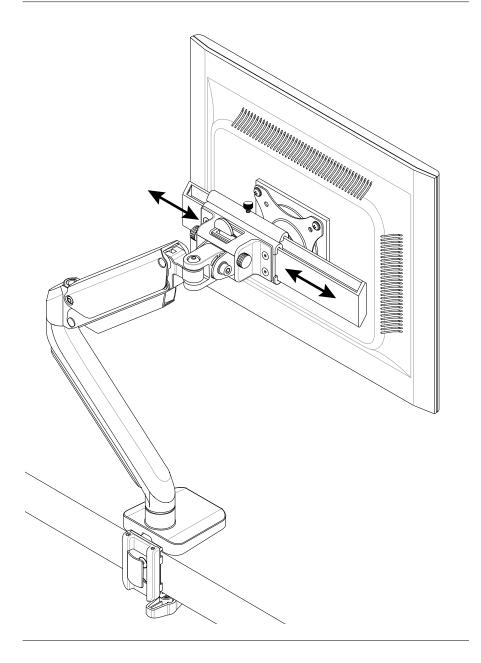

Step 6: Loosen the upper and lower screws.

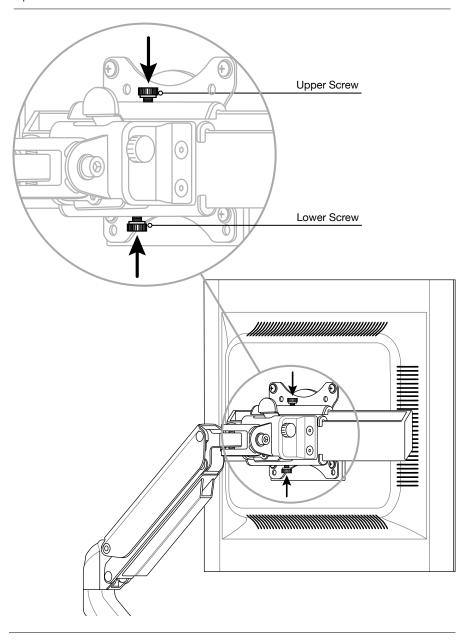

Step 7: Move slider left or right into the desired position.

Step 8: Tighten the upper and lower screw to fix the slider's horizontal position.

Step 9 (Optional): Adjust monitor position.
