SCREEN MOUNT COMPATIBILITY GUIDE

Primary applications, compatibility, and incompatibility issues are noted below.

| Privacy					
Screen mounts	Key Application	Movable/ Fixed	Key Benefit	Product Compatibility	Accessory Compatibility
Edge Mount	Primary application - around the perimeter of the worksurface Side screens between worksurfaces	Movable	Clamps on to any worksurface Most stable solution for side screens	Will need to adjust height adjustable table legs inward for best clearance when using edge mount on the side of the table Not compatible with 42" wide Switchback 2 leg height adjustable tables Works with Prise single sided benching Not compatible with Prise back to back configurations	Compatible with Mobio, Unity G2, and King Cobra monitor arms when the monitor arms are installed through a grommet cutout Compatible with EON and Current clamp on power accessories
Top Mount	Primary application - around the perimeter of the worksurface Top of panel systems	Fixed	Permanently attaches to worksurfaces and panels for greater stability (attached by fasteners - will leave holes when removed)	Not applicable	Compatible with Mobio, Unity G2, and King Cobra monitor arms when the monitor arms are installed through a grommet cutout Not compatible with EON or Current clamp on power accessories Not compatible with Mobio, Unity G2, or King Cobra monitor arms when monitor arms are installed using clamp on method
Middle Mount	Side screens between worksurfaces	Movable	Most movable solution between individuals, best used when there is limited space to clamp on to the side or rear of the worksurface	Will need to adjust height adjustable table legs and hand control inward for best clearance when using middle mount on the side of the table	Not applicable
Freestanding	Between individuals on larger worksurfaces Used as a protective barrier in reception areas	Movable	Simple temporary solution for impromptu meetings where you need some separation Easily movable, can easily create multiple spaces on one surface	Not applicable	Not compatible with clamped on accessories
Panel Mount	Top of panel systems	Movable	Add extra protection to panel systems without defacing the surface	Not applicable	Not applicable

Privacy + Modesty

Screen mounts	Key Application	Movable/ Fixed	Key Benefit	Product Compatibility	Accessory Compatibility
Height-Adjustable	Primary application - around the front of the worksurface	Fixed	Provides coverage above and below the desk Allows users to easily adjust their level of privacy	Not compatible with Prise single sided or back to back configurations Tensor - need to undersize by 12" from the top size and for Switchback it's 6" from the top size	Provides 1 3/8" space between the screen and tabletop for accessory cables and clamp on accessories
Midway	Primary application - around the front of the worksurface Also used on the sides of the worksurface	Fixed	Provides coverage above and below the desk Mounts screen in the same position for a unified appearance across multiple workstations	Works with Prise single sided benching Not compatible with Prise back to back configurations Need to inset legs further on height-adjustable tables to accomodate the midway mount on the side of the worksurface Could have restrictions using the midway clamp on the return of an L-shaped Tensor table **MT5:** 30" tall screens provide 18" of privacy above the worksurface and 10" of modesty coverage below. 24" tall screens provide 12" of privacy above the worksurface and 10" of modesty coverage below. **MT5H:** 30" tall screens provide 24" of privacy above the worksurface and 4" of modesty coverage below. 24" tall screens provide 18" of privacy above the worksurface and 4" of modesty coverage below.	Provides 1 3/8" space between the screen and tabletop for accessory cables and clamp on accessories
