## INSTALL FACTS:

**Sales Rep:** Eaton Group

**Dealer:** Business Interiors Northwest

**Time Frame:** April – July 2014

**Product:** Visit, Mezzanine Occasional, Mezzanine Cube

## ABOUT THE PROJECT

Betty Brady of Brady Design, LLC took on a unique project when she won the bid for the Northrim Bank. Her team would be remodeling a space that houses the bank's safety deposit offices, the IT department, processing, the break room and the training room. Oh yeah. And it's in the basement.

## WHAT MADE THE DIFFERENCE?

Making a basement space fresh, light and appealing is a tall order anywhere. And in Alaska, with months of early sunsets and long nights, it's even harder. But Betty was confident about the project. She knew that even on a tight budget, she could find products that would fit the unique space. She brought in a Visit for the customers to do a sit test. They loved the comfort, quality and appearance of the chairs. And the budget made it a perfect fit.

The bank also liked Mezzanine side tables for their compatibility with the seating, the leg detail and the wood finishes.

In no time, the products were delivered and the space was transformed.

## WHAT'S NEXT

Northrim Bank is now working on standardizing on the look of their basement space, and are keeping SitOnIt Seating products in mind for other projects going forward
